SCIENCE EDUCATION

Formerly GENERAL SCIENCE QUARTERLY

THE OFFICIAL JOURNAL OF

The National Association for Research in Science Teaching
The National Council on Elementary Science, and
The Science Association of the Middle States

Copyright, 1947, by SCIENCE EDUCATION, INCORPORATED

EDITOR
CLARENCE M. PRUITT
School of Education
Oklahoma A and M College
Stillwater, Oklahoma

VOLUME 31—NUMBERS 1 TO 5

FEBRUARY—DECEMBER, 1947

SCIENCE EDUCATION, INCORPORATED
525 West 120 Street
New York City

Published
February, March, April, October, and December
1947

BOYD PRINTING CO., INC.
ALBANY, N. Y.

INDEX TO VOLUME 31

ABSTRACTS

32–34; 103–104

ARTICLES

Applications of High Energy Betatron Radiations, 7–9.
Aviation Education Problems Needing Investigation, 244–247.
Betatron in Cancer Therapy, Possibilities of, 9–11.
Betatron Radiations, The Applications of High Energy, 7–9.
Biology—An Evaluation, 164–171.
CALDWELL, OTIS WILLIAM, 283–286.
Centenary of the British Chemical Society, The, 179–180.
Civilian Education, Implications of the Training Program of the Armed Forces for, 81–99.
Comments Made at Different Sessions of the NARST Program, 247–249.
Education of Science Teachers are in Need of Research by Individual or Groups of Specialists?, What Problems Related to the, 234–235.
Electronics in General Education, The Place of, 11–14.
Elementary Science Education Should be Investigated?, What Problems in, 199–201.
Elementary Science in General Education, The Place of, 221–224.
Elementary Science, Proposed Research Problems in the Field of, 206–207.
Entomology of Significance in General Education, A Determination of the Principles of, 23–32; 144–157.
Evaluating Elementary Science Teaching, A Helpful Step, 76–78.
Field Excursions in Geology, 127–130.
Fifteen Years of the National Association for Research in Science Teaching, 250–261.
Forty-Sixth Yearbook National Society for the Study of Education, Discussion of the, 307–309.
Geology, Field Excursions in, 127–130.
High School Sciences, Research Needed in, 220.
Human Welfare, Science and, 20–23.
Individual Laboratory Method Compared with the Lecture-Demonstration Method in Teaching General Biology, The, 175–179.
Junior High School Level, Needed Research in Science Teaching at the, 209.
Junior High School Need Attention, What Problems Related to Science in the, 210.
Laboratory Studies Which Will Teach the Scientific Method, How to Write, 14–17.
Laboratory Study Designed to Teach the Scientific Method, An Analysis of a, 157–164.
Lecture-Demonstration Method in Teaching General Biology, The Individual Laboratory Method Compared with the, 175–179.
Magic Bullets as an Educational Aid, Using the Film, 324–325.
Membership National Association for Research in Science Teaching, 268–271.
Mid-Semester Marks to Final Marks, Relation of, 325–327.
National Council of Elementary Science Program, 78–80.
Need of Research by Individuals or Groups of Specialists, What Problems Related to the Education of Teachers are in, 231–234.
Objectives in the Teaching of Secondary Biology, The Present Status of General, 171–175.
Official Minutes, 263–267.
Opaque Projector with Overhead Projection, Building an, 1820.
OTIS WILLIAM CALDWELL, 283–286.
Past Officers, 273.
Principles of Physics in Practical Situations, The Measurement of the Ability to Apply, 130–144.
Problems for Research, 202–203.
Program of Twentieth Annual Meeting of National Association for Research in Science Teaching, 262–263.
Radio Education, Comments from Point of View of, 235–238.
Recent Changes of Positions in Science, 344.
Recently Elected Members of NARST, 272.
Recently Elected Officers of NARST and NCES, 180.
Research in Science Teaching, 228–231.
Rocks in the Lower Grades, Teaching, 71–76.
School Environment as a Study of Natural Outdoor Play Material for Kindergarten Children, 99–103.
Science and Human Welfare, 20–23.
Science Education in American Schools, 295–299.
Science Education in American Schools: Discussion of the Forty-Sixth Yearbook of the National Society for the Study of Education, 313–320.
Science Education in American Schools: The Yearbook as Viewed by the School Administrator, 309–313.
Science Education in Large City High Schools, Some Problems of, 239–244.
Science Education of Teachers, Directives for Research in the, 224–227.
Science for Elementary School Children, 69–71.

Science Instruction in the Elementary Grades, The Yearbook as it Relates to, 304–307.
Science Instruction in the Secondary Grades, The Yearbook as it Relates to, 300–303.
Science Objectives in the Secondary Schools of California, The Present Status of, 287–295.
Scientific Method, An Analysis of a Laboratory Study Designed to Teach the, 157–164.
Scientific Method, A Direct Approach to Teaching the, 203–205.
Scientific Method, How to Write Laboratory Studies Which Will Teach the, 14–17.
Secondary School Science, Research Needed in, 214–217.
Senior High School Science, Some Research Needs in the Teaching of, 211–214.
Senior High School Sciences, Some Suggestions for Research in the, 217–219.
Skills and Techniques Acquired in Freshman Chemistry, A Practical Examination of, 320–324.
Teachers of Elementary Science, Suggested Preparation for, 61–68.
World Our Pupils Face, The, 55–60.
